

Better not to give a constraint on zone since the admin might remove a zone,  
while we still need to keep the reservation history

Reservation

<u>confirmation#</u>	phone#	zone	date	fee	is_cancelled
----------------------	--------	------	------	-----	--------------

Zone

<u>zone</u>	max_designated_spots
-------------	----------------------

Rate

<u>zone</u>	<u>date</u>	rate
-------------	-------------	------

Event

<u>event_id</u>	event	venue	date
-----------------	-------	-------	------

Customer

<u>phone#</u>	fname	lname
---------------	-------	-------

Distance

<u>zone</u>	<u>venue</u>	distance
-------------	--------------	----------

Venue

<u>venue</u>	address
--------------	---------

(not necessary, but a bug constantly appeared when I loaded data with only one column,  
so I added it)
